DETAILED ACTION

Allowable Subject Matter

1. Claims 2-5 allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 rejected under 35 U.S.C. 102(e) as being anticipated by De Jonghe et al. (6,911,280).

De Jonghe et al. disclose a chemical protection of a lithium surface where in Fig. 4 it is disclosed a battery cell with an electrolyte fluid 416, a first electrode 414 and a second electrode 420, a nanostructured surface 408 between the electrolyte fluid 416 and the first electrode 414 where the nanostructured surface prevents contact between the electrolyte fluid and the electrode.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2826

5. Claims 6-8 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification and the claims fail to reasonably convey to one skill in the relevant art how laser generating device is attached to target.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 rejected under 35 U.S.C. 103(a) as being unpatentable over Hasebe et al. (2003/0027613) in view of De Jonghe et al. (6,911,280).

Hasebe et al. disclose a laser gun and shooting system for the same where in Fig. 7 it is disclosed a laser generating device including laser 34 and battery 31 and means for attaching generating laser generating device 7 to the target plate. Hasebe et.al. fail to disclose the required battery for the laser generating device. However, De Jonghe et al. disclose a chemical protection of lithium surface where in Fig. 4, electrolyte fluid separated from electrode 414 by chemical protection surface 408.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required battery for the laser generating system in

Art Unit: 2826

Hasebe et al. as taught by De Jonghe et al. in order to have a laser generating system with increased performance.
